

Responsible use of antibiotics protects animals and people

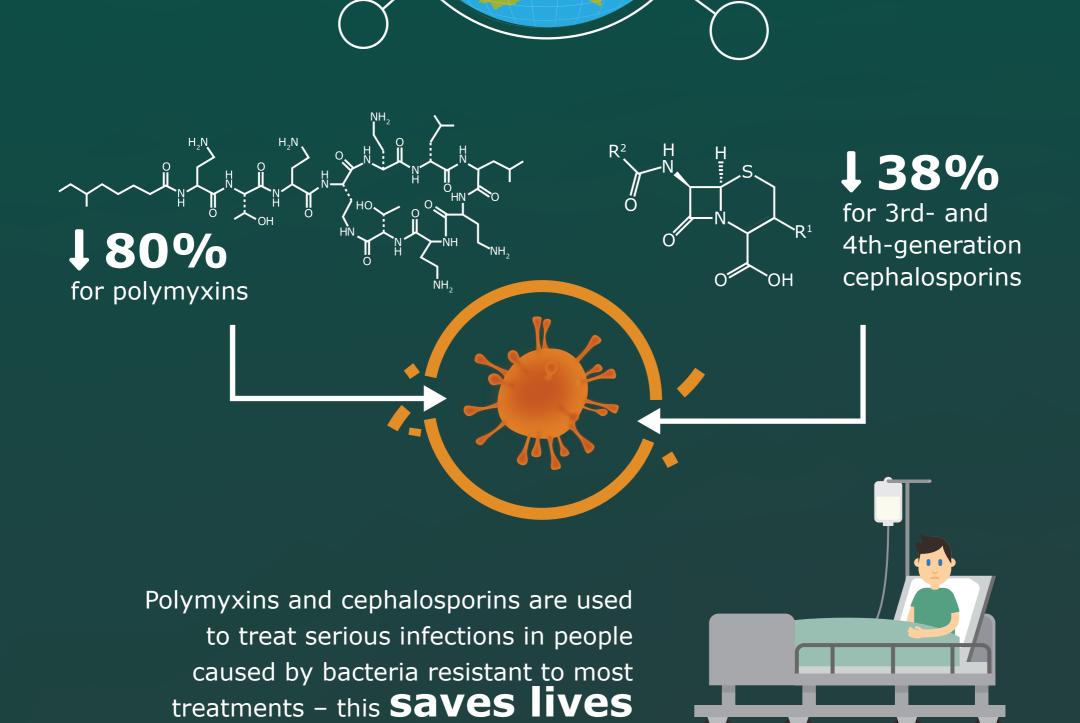

Europe is on the right track to fight antibiotic resistance...

2011-2021

Sales of antibiotics for veterinary use are declining

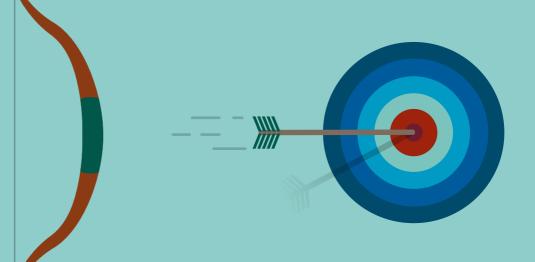

overall sales in 25 of the 31 countries in the ESVAC network **J 60%** in some countries

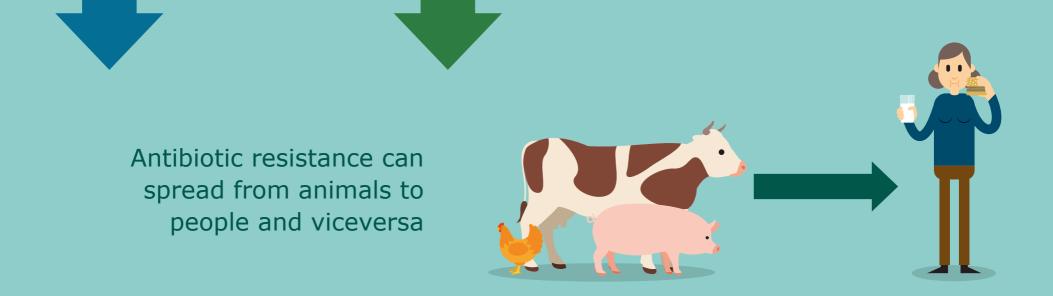

...but more needs to be done

60% decrease in some countries indicates the **potential** for reducing the use of antibiotics in animals in other countries

Less antibiotics in animals and humans = **lower risk** of bacteria becoming resistant

When antibiotics no longer work, people and animals' lives are at risk

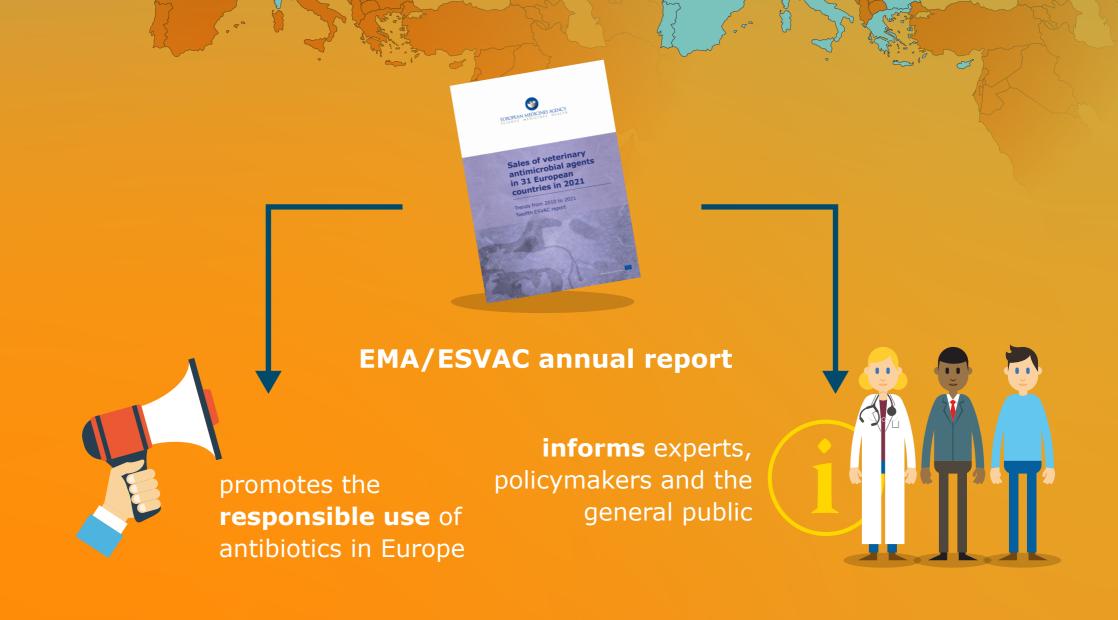

Collaboration that works

EMA **monitors sales** of antibiotics for veterinary use in Europe to promote their **prudent use**

Since 2010

voluntary participation increased from 9 to **31 countries**
