Create and submit a CSR

A CSR is a report of an individual study of an investigational medicinal product, in which the clinical and statistical description, presentations, and analyses are integrated.

The CSR must be submitted within **30 days** after the day the marketing authorisation has been granted, the procedure for granting the marketing authorisation has been completed, or the applicant for the marketing authorisation has withdrawn the application. It is considered the end of the clinical trial life-cycle in CTIS.

This step-by-step guide aims at explaining how to submit and update a CSR in CTIS. This material serves as support documentation for Module 13: Clinical study reports submission.

Submit a CSR

- This section outlines the steps that users need to follow to submit new CSRs.

Update a CSR
