European Shortages Monitoring Platform Essentials and Industry Reporting Requirements

24 June 2024, 10.00 – 12.30 CEST

WebEx, Live broadcast

The European Shortages Monitoring Platform (ESMP) Essentials and Industry Reporting Requirements Webinar aims to provide an overview of the ESMP and the information that will be reported through it by the pharmaceutical industry once it is operational.

The event will take place on 24 June 2024, 10:00 – 12:30 (CEST) and is aimed at all marketing authorisation holders (MAH) in the EU/EEA. Kindly note that registration to this event is not mandatory and is now closed. The live broadcast will be accessible via the event page during the scheduled time.

During this session, the ESMP team will explain EMA shortage management processes at EU/EEA level, ESMP milestones and dependencies, and data elements in scope of reporting requirements to EMA through the ESMP. Additionally, there will be an opportunity to ask questions at the end of the webinar through a dedicated Slido.

As the first go-live of the ESMP approaches in Q4 2024, launching routine shortage reporting for centrally authorised products (CAPs) by MAHs, this webinar is part of a series of events planned throughout 2024 and 2025 to promote awareness and knowledge about the platform. EMA aims to equip MAHs with all essential insights and information needed to navigate the platform effectively when it is live.

Please note: The webinar will be broadcast live, recorded, and available on the event page shortly after the event.

European Shortages Monitoring Platform Essentials and Industry Reporting Requirements

Chaired by *Pedro Pina Ferreira (EMA)*

10:00	Welcome and opening of the webinar	
	Introduction	5'
	<i>Pedro Pina Ferreira (EMA)</i>
